

FAASTeam presents:

14th Annual New England Seaplane Safety Expo

Accidents are still happening in the seaplane community affecting pilots of all experience levels. We will examine two seaplane accidents that happened in Maine and New Hampshire last year. One was an amphibious Cessna 206 that landed gear down on the water and another was a Cessna 185 involved in a low-light glassy water landing accident. Our pilot training does little to prepare us for exiting a submerged aircraft. Survival Systems USA out of Groton CT has created an eight hour course composed of classroom and pool training in a cockpit simulator. A representative from their organization will provide an overview of their program and a seaplane egress course will be scheduled. Click on the link below and register TODAY.

Directions: Rt 302 to Rt 114 (in Naples). Turn onto Rt 114 and proceed 2/10ths of a mile. Turn left onto Seaplane Cove Road and proceed to parking.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
